

EcoSquare®

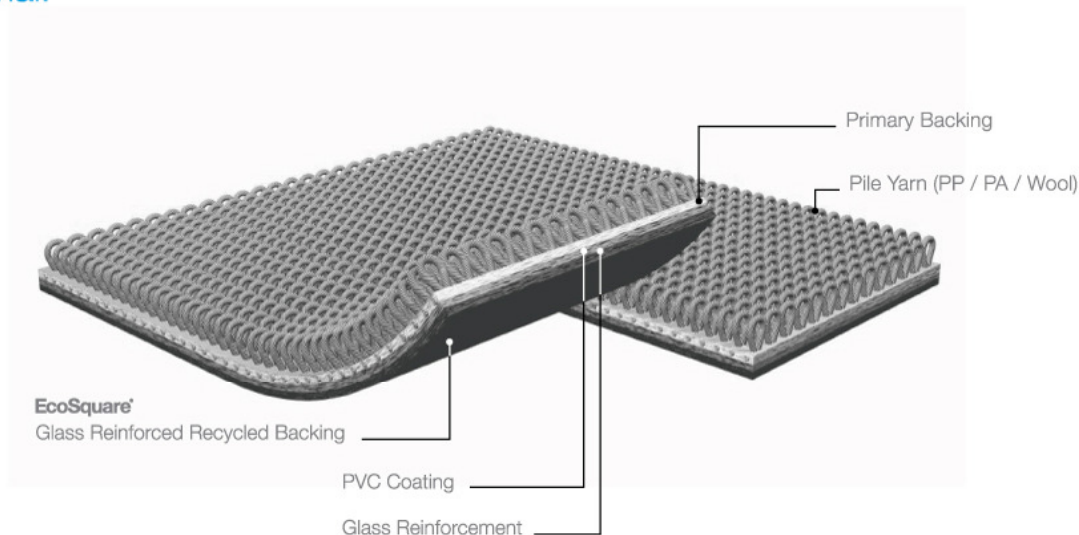

EcoSquare marks a new era in the development of high performance and environmentally sustainable backing.

EcoSquare is our new generation of recycled content PVC carpet tile backing. Carpets Inter's EcoSquare tiles range from 44.5% to 48% recycled content. At the end of the products' useful life the EcoSquare tiles are 100% recyclable.

Sustainable Performance and Value

EcoSquare is another step in Carpet Inter's ongoing Sustainability and Reclamation Program. In this case we repurpose waste material into a recycled content tile backing that performs as well as one using virgin material.

EcoSquare® Outstanding Features

- > 100% recyclable
- > Excellent performance and dimensional stability
- > Meets most budget requirements
- > Potential LEED points contribution is 3 to 7 points
